New Connections: Increasing Diversity of RWJF Programming, a national program of the Robert Wood Johnson Foundation

Presented By
Latina and Latino Critical Legal Theory, Inc.
LatCrit, Inc. and the Society of American Law Teachers (SALT) are pleased to invite you to the Ninth Annual Junior Faculty Development Workshop (FDW), immediately preceding the LatCrit XV program. This annual workshop is designed for critical, progressive, and social justice oriented pre-tenure professors, including clinicians and legal writing professors, as well as those who may be contemplating a teaching career. However, we encourage more senior members of the profession to attend, share their experience, and serve as resources and mentors.

The FDW is designed to familiarize critical, progressive, and social justice oriented junior faculty with LatCrit and SALT principles and values and support them in the scholarship, teaching, and service aspects of professional success. In addition, the FDW seeks to foster scholarship in progressive, social justice, and critical outsider jurisprudence, including LatCrit theory, among new and junior faculty, students, and practitioners. Finally, the FDW aims to cultivate a community of scholars interested in the continuation of this and similar projects over the years. Please inform your progressive and critical colleagues who are interested in making social justice central to their teaching, scholarship, and activism about this event.

To facilitate community building through shared experiences and the exchange of ideas, we hope that all participants will attend the entire workshop.

**10:00-11:30a.m. THE LATINA/O ACADEMY PLENARY EVENT**

Exploring the Possibilities: A Latina/o Academy?
The problem of the 21st century will continue being in great part the problem of the lines between the normal and the abnormal, and knowledge production will take a central part in this. Today in the United States, there are attempts to not only contain the demographic growth of Latina/os, but also to delegitimize, even prohibit, their histories, memories, questions, and methods for producing knowledge. In face of these challenges and the increasing mobilization against the emerging neo-nativism in the country, there is arguably the need to create more institutional spaces and projects to complement the multiple efforts of progressive Latina/os and other scholars who aim to transform, if not decolonize, the academy. The scholars in this plenary roundtable will speak about an initiative to create a Latina/o Academy of Arts and Sciences, which aims to contribute to the defense of substantial forms of social and theoretical pluriversality in the effort to validate, strengthen, refine, and expand the impact of emancipatory scholarly practices in the 21st century Americas.

11:45 a.m. - 1:15 p.m. CONFERENCE THEME PLENARY

Race, Resistance, and Solidarity in the International Order
The plenary session will assess the structural dynamics that sustain relations of global inequality and hierarchy. These dynamics (among others) include forces of global capital, the American position in international relations, and the persistent legal and political effects of past colonization and imperial authority. The discussion would seek to highlight the common dependencies that today mark the experience of distinct communities in both the global north and the global south (from new immigrants in the U.S. and Europe to those in the south facing the brunt of military and political intervention). Theoretically, the plenary would offer an intervention that considers how different communities are located relative to structures of global power, including through the operation of international law. Politically, an exploration of these shared dependencies would provide an analytical lens for imagining forms of cross-ethnic and cross-racial solidarity, clarifying ideals of self-determination and sovereignty, and ultimately uncovering new spaces for dissent and mobilization. In developing these accounts both...
of global structure and popular agency, one possible focus could be a close examination of the justifications, exercise, and consequences of Pax Americana. By considering the linkages in American policies across different countries within a particular region (in the context of the "Arab Spring," for instance) as well as across regions, the session might offer a critical interrogation of the exercise, operation and consolidation of one (or more) forms of contemporary imperial power.

Legal Education, Social Justice and the Law School Dean: Latinas at the Center

Sixteen years ago, at the inception of LatCrit theory, no Latina had yet served as dean of a U.S. law school, but in the last year the number doubled from two to four. Why? Coincidence, individual accomplishment, social change? What does the ongoing work of these pioneers, and others like them, portend for the future of formal legal education? How should critical scholars plan to meet the intensifying assaults on social justice projects and legal reforms that we see all around us? How can we teach and inculcate knowledge, skills and values as law school teachers and administrators to help ensure the vindication of equal justice aspirations? These four remarkable women join us for a roundtable to explore these and similar questions, and the possibilities that their work opens for social justice progress through progressive legal education.
